RESEARCH ACTIVITIES

Research Projects

Design and/or conduct of research protocols in collaboration with Prof. Paola Rocca on the following clinical trials approved by the Local Ethics Committee:

- Assessment of factors influencing real-life functioning in patients with schizophrenia (Italian Network for Psychosis Research - follow-up) (investigator)
- Assessment of factors conditioning social functioning and their neurobiological correlates in patients with schizophrenia (Italian Network for Psychosis Research - add on neuroimaging) (investigator)
- Experimental, single-center, pragmatic, open-label study: cognitive rehabilitation using cogpack software in patients with schizophrenia (investigator)
- Neuroimaging study on pre- and post-cognitive rehabilitation brain connectivity changes in patients with schizophrenia (design and conduct)
- Study of Citron as a possible predisposing gene for the development of schizophrenia spectrum disorders and bipolar disorders (design and conduct)
- First psychotic episode and recovery: evaluation of treatment with oral or long-acting antipsychotic as part of an integrated intervention (design and conduct)
- Microvesicles at the INtersection between Dysbiosis and Major dEpressive disorder: an OMIC approach (MIND-ME) (design and conduct)
- GREEN and BLUE: a study to assess the impact of living in an urban environment near greenery and practicing activities in greenery on depressive symptomatology in patients with depressive, bipolar or schizophrenia spectrum disorders (design and conduct)
- PsychSTRATA: A Stratified Treatment Algorithm in Psychiatry: A program on stratified pharmacogenomics in severe mental illness. Grant agreement No: 101057454 (participation).
